

# State-wide Equipment Program (SWEP)

## Information RE: Ramp Modifications

The department strongly recommends that all ramp modifications comply with *Australian Standard 1428.1 -2001 (AS1428.1)* as there may be a safety risk associated with ramp modifications that do not comply with AS 1428.1

Although AS 1428.1 specifically excludes work to private residences, it is the most relevant standard in relation to the work carried out by the State-wide equipment program (SWEP) in the funding of home modifications for people with a Disability.

The purpose of the attached Acknowledgments and Release is to ensure that all parties are aware of a possible risk and to indicate why a non-compliant modification is required for your particular needs.
