

# The standard for registration and credentialing (*The Standard*) Orthotist/ Prosthetists

## Summary

The State-Wide Equipment Program (SWEP) offers eligible Assistive Technology (AT) Practitioners a registration and credentialing process, whereby AT Practitioner credentialing levels specific to an AT category are assigned, according to *The Standard* outlined here.

This standard provides an objective means of structuring, measuring and authorising AT Practitioners to deliver AT solutions.

Based on an assessment of eligibility, experience, training and skill, AT practitioners are assigned a credentialing level that reflects the level of complexity they can safely and effectively address within a specific AT category. SWEP uses a traffic light based colour system to rate AT Practitioner credentialing level progressing from Green to Amber and then Red.

It is important to note that the provided SWEP practitioner ID number and credentialing levels are to be used for SWEP purposes only and may not be shared with other agencies/ funding bodies without the express permission of SWEP.

Where SWEP credentialed AT Practitioners also make application for AT items with SWEP, this assigned AT Practitioner credentialing level is integrated into the SWEP online application processes and privileges.

### Does this standard apply to me?

This standard applies to all AT Practitioners who register and credential with SWEP, as well as those wanting to maintain their credentialed status with SWEP or make applications for AT items through the SWEP online application portal.

#### What does this mean for me?

There are five individual standards that need to be met regardless of your profession, credentialing level or the type of credentialing application you are making. The standards are summarised in the table below.

Standards to be met				
Standard 1.	Threshold credentials for the AT category			
Standard 2.	Additional agency/ funding body requirements			
Standard 3.	Experience and currency delivering AT solutions in the AT category			
Standard 4.	Accrual of AT Practitioner continual professional development (CPD) points			
Standard 5.	Participation in audit and review processes			

The types of credentialing applications you can make with SWEP are summarized in the table below.

Credentialing application type	Descriptor
Initial (inexperienced AT	This applies to an inexperienced AT Practitioner or new graduate
Practitioner or new graduate)	clinician, registering and credentialing as a Green AT Practitioner for
	the first time.
Initial (experienced AT	This applies to AT Practitioners with considerable experience
Practitioner)	implementing AT solutions, prior to their engagement with SWEP.
	Credentialing level(s) are assigned for the first time based on a skills
	recognition process.
Add AT category	This applies to AT Practitioners wanting to add an AT category to their
	existing registration profile. This may happen due to a change in scope
	of practice, or the completion of training or roles, that allow you to
	meet additional credentialing requirements.
Upgrade	The process whereby the AT Practitioner applies to have their
	credentialing level within the SWEP framework upgraded to amber or
	red in any one or more AT category/ ies.
Re-credential	The process whereby the AT Practitioner applies to maintain their
	current credentialing level and /or application privileges with SWEP
	within a five-year cycle. It is a periodic re-evaluation to verify that you
	continue to meet credentialing standards set by SWEP

The specific standards that apply to your profession and credentialing application type, and further details on the evidence/ documents to be submitted with your application, are outlined in <u>Table 1 The Standard</u> for your profession or area of practice e.g. Occupational Therapist, Lymphoedema Therapist.

For further details on CPD activity types and rules that relate to your credentialing application refer to the *CPD activity quidelines*.

Your compliance with this standard may be audited from time to time to ensure adherence. If it is discovered that credentialing levels or access to AT categories has been endorsed by SWEP based on false or unsupported information, privileges afforded by your credentialing level may be reviewed.

#### Keeping evidence

You should maintain records that support your credentialing application (particularly your AT Practitioner CPD activity) for five years so it can be provided in the case you get audited. The <u>AT Practitioner CPD summary portfolio</u> can be used to record your CPD evidence.

### Will special consideration be given if I don't meet the standard?

If you believe you possess the appropriate level of skill and competence to provide services in this area of practice, but do not meet the required standards, you can submit a credentialing application through the SWEP Practitioner portal with supporting evidence and we will assess your application on a case-by-case basis to determine your credentialing level. For example, requesting to move directly from Green to Red or upgrade from Amber to Red with less than 3 years' experience at Amber.

Special consideration application will only be considered in exceptional circumstances. In order to be considered for a special consideration request you must meet the following two requirements;

- have evidence of targeted learning and have considerable mileage that includes high complexity across both consumers and assistive technology items/ service provision
- have at least 2.5 years of full-time equivalent experience in this area of practice at either Green and/or Amber.

Applications that do not fully meet *The Standard* for your profession or area of practice, will be reviewed by the Chief Allied Health Officer or delegate. Special consideration may be given to assign the requested credentialing level.

## Right of Appeal

Any AT Practitioner may appeal to have decisions made by SWEP reviewed, by contacting the SWEP Chief Allied Health Officer on <a href="mailto:swepcaho@gh.org.au">swepcaho@gh.org.au</a>. However, after the appeal has been reviewed, the outcome of the appeal is final.

## What happens if I apply but don't meet this standard?

If you submit a credentialing request and it is deemed that you do not clearly meet the standard, your application will not be endorsed. This will be communicated to you, with opportunity to provide further information if relevant.

## What happens if there is a change to my registration or clinical practice?

In the event that conditions, reprimands or restrictions are placed on your registration, clinical practice or professional association membership, you must advise the Chief Allied Health Officer immediately in writing at <a href="mailto:swepcaho@gh.org.au">swepcaho@gh.org.au</a>

#### Review

This standard will be reviewed from time to time as required. This will generally be at least every five years.

Last reviewed: July 2019
